

Oxy-fuel Gas Systems Set-up & Pre-use Check

If you can't identify the hazards you can't assess the risks

This 2 hour Instructor-led workshop provides practical instruction on the correct assembly and pre-use check of oxy-fuel gas systems

Benefits

- Training delivered by highly skilled, industry trained, experienced course directors
- Staff are made aware of the hazards so they can identify risks and adopt safe working practices
- Staff will appreciate the need to treat all gas control equipment with respect
- Appreciate that correct nozzle selection and gas flow can improve process and reduce wastage

Who should attend?

- Anyone using oxy-fuel gas systems on site
- Production and other managers with operational responsibilities for oxy-fuel gas systems
- Managers, supervisors and staff from all functions who are responsible for the safe use of oxy-fuel gas systems within their departments
- Risk managers and anyone responsible for health and safety

"We have used this practical workshop on several occasions. Each time it has been absolutely ideal for the needs we have within Balfour Beatty. The trainer was very professional and carried out the workshop as though he thoroughly enjoys his job."

Wendy Gerrish, Balfour Beatty Power
Dartford

Workshop overview

- The need for personal protective equipment
- Single and multi-stage regulators
- Pre-use visual checks on regulators
- Correct fitting of gas regulators
- How flashbacks occur
- The need for arrestors
- Correct hose selection
- Using hoses safely
- Torch design and selection
- Correct nozzle selection
- Correct set-up of an oxy-fuel gas workstation
- Safe working practices
- Incidents caused by incorrect working practices
- Practical workshop session

What you will learn

The workshop will enable participants to:

- Correctly identify gas cylinders
- Identify functional differences between regulator types
- Undertake a pre-use visual check on gas regulators
- Select and fit the correct flashback arrestors
- Identify the correct hoses to be fitted
- Select the correct cutting torch and nozzle
- Undertake functional tests on regulators
- Set the correct gas pressure for the nozzle being used
- Correctly set-up an oxy-fuel gas workstation
- Correctly leak test an oxy-fuel gas system
- Recognise the need for safe shut-down procedures

Please note: All delegates must be supplied with, and wear, appropriate PPE during the practical session i.e. eye protection, safety shoes and safety gloves.

Workshop price

Oxy-fuel Gas Systems Set-up & Pre-use Check (2 hours)
£765 for up to 8 delegates, additional delegates £95 per head up to a maximum of 12 delegates. VAT is payable at the standard rate.

Please note it is essential that delegates have completed the relevant safety awareness workshop before attending this practical workshop

Gas Safe^{LTD}

Additional Information

If you can't identify the hazards you can't assess the risks

First step...choose the relevant safety awareness workshop

All delegates must have completed the appropriate online or Instructor-led safety awareness workshop before they can participate in the practical workshop. In the case of Instructor-led Safety Awareness Workshops the practical is usually held in the afternoon of the same day.

- e-Learning 'Using Oxy-fuel Gases Safely'
- Industrial Gases Safety Awareness Workshop
- Industrial Gas Safety Awareness for Refrigeration Engineers

Providing total training solutions for gas users...

- All your delegates will receive a certificate of attendance and comprehensive workshop literature for continued reference purposes in the workplace. This includes relevant Standard Operating Procedures if a practical workshop has been attended.

e-Learning

Packages are available for those clients who need a more flexible, accessible method of training which delivers high quality affordable training without the need to gather employees together in a classroom. This method of training is ideal for single users, new starters or as refresher training.
