

Safe Manual Handling of Gas Cylinders

If you can't identify the hazards you can't assess the risks

This half-day Instructor-led workshop is designed for stores personnel and staff in similar roles who do not use gas directly, but do handle & store gas cylinders

Benefits

- Training delivered by highly skilled, industry trained, experienced course directors
- Efficiently ensure that staff are trained in all aspects of gas safety
- Cost-effective on-site training
- Staff are made aware of the hazards so that they can identify risks and adopt safe working practices

Who should attend?

- Anyone handling or storing gas cylinders on site
- Production and other managers with operational responsibilities for safety
- Managers, supervisors and staff from all functions who are responsible for the safe use of gases within their department
- Anyone responsible for health and safety

"The course content and practical training was first class and gave our operators the knowledge and confidence to store and handle industrial gas cylinders safely. As well as the above I appreciated your advice on gas safety as regards how our facilities and EH&S management systems could be improved upon."

Rod Cummins, HS EH&S Regional Leader UK & Ireland
HS Marston

Workshop overview

- Manual Handling Operations Regulations 2002
- Risk Assessments and the need for Standard Operating Procedures
- Gas cylinder design and identification
- Hazards posed by pressure
- Gas properties and potential hazards
- The need for personal protective equipment and appropriate equipment for safe manual handling of gas cylinders
- How the back works and types of injury
- Manual handling activities - lift, lower, push, pull, twist, supporting and transporting
- Lifting techniques and mechanical aids
- Practical session

What you will learn

The workshop will enable participants to:

- Correctly identify gas cylinders
- Identify potential hazards, risks and the properties of various gases
- Recognise the need for appropriate Personal Protective Equipment (PPE)
- Appreciate the need to store gas cylinders correctly
- Recognise the need to use correct manual handling aids
- Safely 'milk churn' a gas cylinder
- Identify key dangers when trying to lift a cylinder

Please note: All delegates must be supplied with, and wear, appropriate PPE during the practical session i.e. eye protection, safety shoes and safety gloves.

Workshop price

Safe Manual Handling of Gas Cylinders (3½ hours)
£980 for up to 8 delegates, additional delegates £95 per head up to a maximum of 12 delegates. VAT is payable at the standard rate.

Additional Information

If you can't identify the hazards you can't assess the risks

Next step...do your delegates require practical training?

Individuals who use gases will require additional training with regard to safe use of gases. This workshop can be incorporated into the appropriate Gas Safety Awareness Workshop in order to meet their requirements.

Gas users may also require additional practical training;

- Connecting Regulators and Cylinder Set-up
- Oxy-fuel Gas Systems Set-up and Pre-use Check
- Oxy-fuel Gas Systems Maintenance Inspection

Also available are practical workshops that combine safety, process & practice

- Practical Oxy-fuel Gas Cutting & Burning Training
- Practical Brazing & Soldering Training
- Practical MIG (GMAW) Welding Training
- Practical TIG (GTAW) Welding Training

Providing total training solutions for gas users...

- All your delegates will receive a certificate of attendance and comprehensive workshop literature for continued reference purposes in the workplace. This includes relevant Standard Operating Procedures if a practical workshop has been attended.

e-Learning

Packages are available for those clients who need a more flexible, accessible method of training which delivers high quality affordable training without the need to gather employees together in a classroom. This method of training is ideal for single users, new starters or as refresher training.
